

The Company

Air Conditioning Products Group (ACP GROUP) was founded in 1987 and has since become one of the UK'S leading INDEPENDENT air conditioning specialists.

SERVICE & REPAIR EQUIPMENT

We innovate and work with many equipment manufacturers to produce, improve and deliver world class equipment that today's engineer deserves.

All our equipment is cherry picked for it is our belief they are the best available, taking technical attributes, quality, durability, reliability in the field and price into consideration.

We are not tied to any one manufacturer.

TRAINING

DOMESTIC & LIGHT COMMERCIAL AIR CONDITIONING INSTALLATION

This course is a hand's on course where learners will actually fit an Air Conditioning unit which will be a first in this industry sector.

We have trained many individuals to achieve their aspirations to work safely and with the best knowledge available. The help we supplied to the above for setting up in-house or their own successful businesses carrying out air conditioning service and repair has been instrumental to their success.

Our training and technical support has also helped many companies and individuals who had already been trained and purchased equipment, get fully trained and utilize their equipment.

Course development of training allows us to offer far more course content than any other short course available in the market place today. We supply a full theory and installation manual to allow the training time to be spent being trained. Not making notes!

This has been the most instrumental part of our learner's success as it provides reference and confidence when first starting and working in the field. It also assists in the easy flow from learner to professional.

CITB. Safe Handling of Refrigerant.

This course is a must for personnel working with refrigerants and is recognized as the standard for which personnel in the Air Conditioning and Refrigeration industry aspire.

FACILITIES

The company's lecturer has 28 years experience and when not teaching continues to work on air conditioning systems and is very hands on.

ACP Group's training centre has state of the art technology and the most up to date tools & equipment for learners to use. It includes a test rig that can simulate the faults engineers will encounter out in the field such as blocked expansion valve, blocked filter drier, over condensing, faulty compressor and poor air flow over evaporator.

TECHNICAL SUPPORT

Due to our unique method of training and our supplying of a theory and installation air conditioning manual, our technical support is rarely utilized. However we supply full technical back up if required.
